I subscribed to XM within the first month of my free trial. I love it and signed up for a 5 year subscription. I expect in a free market society the choices I make should drive the market without government intervention driven by large contributions. It is a basic business principle that if you do not adapt to the consumers wants and needs you will in the history books in no time. I choose to PURCHASE this service because it met my needs. I strongly disagree with the NAB's position and urge FCC to spend its time and MY TAX DOLLARS more wisely.
